CAREER OBJECTIVE

Aspiring **Frontend Developer** and fourth-year Computer Engineering student experienced in building modern, responsive, and interactive web applications. Comfortable reproducing existing layouts, building reusable components, refining responsive behavior, and debugging frontend issues while maintaining clean and organized code. Seeking opportunities to apply and strengthen my frontend skills while growing into a **full-stack software engineer** capable of creating secure, polished, and user-centered solutions.

EXPERIENCE

Self-employed, Remote — ***Freelance Web Developer***

June 2025 - PRESENT

Developing responsive, production-ready web applications using **Next.js**, **TypeScript**, and **Tailwind CSS**, with a focus on frontend functionality, performance, maintainability, and reliable integration with backend services.

- Building reusable and responsive frontend components
- Translating project requirements into functional web interfaces
- Integrating REST APIs, authentication, databases, and third-party services
- Developing backend APIs using **Node.js** and **Flask**
- Building end-to-end solutions such as e-commerce platforms, business websites with email integration, creator platforms, and personal portfolios
- Collaborating remotely and maintaining existing application features

Open to freelance projects, remote collaborations, and long-term opportunities focused on frontend and full-stack web development.

EDUCATION

Laguna State Polytechnic University, San Pablo City — *Bachelor of Science in Computer Engineering*

August 2023 - Present

Our Lady of Sorrows Academy, Dolores, Quezon — Highschool

2017 - 2022

Dolores Central School, Dolores, Quezon — Elementary

2010 - 2016

SKILLS

HTML
CSS
JAVASCRIPT
TAILWINDCSS
Python
C++
Typescript
Next.js
React.js
Firebase
Supabase
TailwindCSS
Blender
Sketchup
Figma

PROJECTS

Bloo Pop - Frontend Developer (Freelance) - *September 2025 - Present*

- Develop responsive features for a creator-focused social platform, including real-time messaging, media sharing, subscriptions, dashboards, settings, galleries, and activity feeds.
- Technologies: Next.js, React, TypeScript, Tailwind CSS, Redux Toolkit, Supabase, and PostgreSQL.

Equity OS - Personal Project - *February 2026 - June 2026*

- Developed a desktop financial-management and trading-journal application for tracking accounts, budgets, expenses, investments, net worth, and financial trends.
- Technologies: Electron, Next.js, React, TypeScript, Firebase, Redux Toolkit, and Recharts.

Who's That Bio - Personal Project - *July 12, 2025 - July 15, 2025*

- Built a real-time quiz application inspired by Who's That Pokémon? with live database updates and event handling.
- Technologies: Next.js, TypeScript, Tailwind CSS, DaisyUI, React Query, and Firebase Firestore.

Issue Tracker - Course Project - *June 7, 2025 - June 11, 2025*

- Developed an issue-management application featuring authentication, filtering, pagination, infinite scrolling, dynamic routing, and form validation.
- Technologies: Next.js, TypeScript, Tailwind CSS, Prisma, MySQL, NextAuth, Zod, React Query, and React Hook Form.

Game Hub - Course Project - *May 20, 2025 - May 28, 2025*

- Built a responsive video-game discovery platform with game browsing, filtering, detailed information, and API-driven data handling.
- Technologies: React, TypeScript, Tailwind CSS, and the RAWG API.

Metafeast - Software Design Final Project - *March 9, 2025 - May 9, 2025*

- Contributed to an immersive 3D restaurant platform featuring digital menus, table booking, ordering, payments, and administrative management.
- Technologies: React, TypeScript, Tailwind CSS, React Three Fiber, Flask, Socket.IO, MySQL, SQLAlchemy, PayMongo, and OpenWeatherMap.

GetLean - Client Project - *February 21, 2025 - February 28, 2025*

- Created a responsive fitness-coaching website featuring workout plans, progress-tracking content, coaching resources, and email integration.
- Technologies: React, TypeScript, and EmailJS.
