CAREER OBJECTIVE

Aspiring **Frontend Developer** and fourth-year Computer Engineering student experienced in building modern, responsive, and interactive web applications. Proficient in using **AI-assisted development tools** to accelerate coding, debugging, testing, and interface refinement while ensuring the quality of the final output. Seeking opportunities to apply and strengthen my frontend skills while growing into a **full-stack software engineer** capable of creating secure, polished, and user-centered solutions.

EXPERIENCE

Self-employed, Remote — ***Freelance Web Developer***

June 2025 - PRESENT

Developing responsive, production-ready web applications using **Next.js**, **TypeScript**, and **Tailwind CSS**, with a focus on frontend functionality, performance, maintainability, and reliable integration with backend services.

- Building reusable and responsive frontend components
- Translating project requirements into functional web interfaces
- Integrating REST APIs, authentication, databases, and third-party services
- Developing backend APIs using **Node.js** and **Flask**
- Using AI-assisted workflows for coding, debugging, testing, and code refinement
- Building end-to-end solutions such as e-commerce platforms, business websites with email integration, creator platforms, and personal portfolios
- Collaborating remotely and maintaining existing application features

Open to freelance projects, remote collaborations, and long-term opportunities focused on frontend and full-stack web development.

EDUCATION

Laguna State Polytechnic University, San Pablo City — *Bachelor of Science in Computer Engineering*

August 2023 - Present

Our Lady of Sorrows Academy, Dolores, Quezon — Highschool

2017 - 2022

Dolores Central School, Dolores, Quezon — Elementary

2010 - 2016

SKILLS

Python
C++
Typescript
Next.js
React.js
Firebase
Supabase
AI-Assisted Development
Codex
TailwindCSS
Blender
Sketchup
Figma

PROJECTS

Bloo Pop — Frontend Developer (Freelance) — *September 2025 – Present*

- Develop responsive features for a creator-focused social platform, including real-time messaging, media sharing, subscriptions, dashboards, settings, galleries, and activity feeds.
- Technologies: Next.js, React, TypeScript, Tailwind CSS, Redux Toolkit, Supabase, and PostgreSQL.

Equity OS — Personal Project — *February 2026 – June 2026*

- Developed a desktop financial-management and trading-journal application for tracking accounts, budgets, expenses, investments, net worth, and financial trends.
- Technologies: Electron, Next.js, React, TypeScript, Firebase, Redux Toolkit, and Recharts.

WhosThatBio — *July 12, 2025 - July 15, 2025*

- A real-time quiz web app inspired by ‘who is that pokemon‘ built on NextJs and Firebase.
- I explore and learn a lot of firebase using its Firestore database and learn more about real-time event handling.

Metafeast — *March 9, 2025 - May 9, 2025*

- An immersive 3D restaurant website featuring real-time table booking, ordering, and admin management.
- Integrated PayMongo API for secure GCash payments and payment confirmation flow.

GetLean — *February 21, 2025 - February 28, 2025*

- A personalized fitness coaching site with workout plans and motivational tips.
- Built using React, TypeScript, and EmailJS; responsive and mobile-friendly.

Issue Tracker — *June 7, 2025 - June 11, 2025*

- A task/issue management system with advanced filtering, pagination, and dynamic routing.
- Built using Next.js, TailwindCSS, Prisma, MySQL, NextAuth.js, and Zod.

Game Hub — *May 20, 2025 - May 28, 2025*

- Developed search, filtering, and game previews for a smooth user experience.

Momento (Social Media Clone) — *November, 2024 - January, 2025*

- Built using Flask, Socket.IO, and Vanilla JS for WebSocket-based chat and live updates.

ECare (JavaFX Desktop App) — *April, 2024 - May, 2024*

- Developed a JavaFX-based application with a clickable human body diagram.
- Users could hover over body parts to receive info on symptoms and related treatments.
